# DOUBLE FACE

A 50-METER VESSEL WITH SPACES THAT CAN BE TRANSFORMED FROM INTERIORS TO TERRACES OVERLOOKING THE SEA, AND A CRUISING SPEED OF 19 KNOTS. THE DESIGN BEARS THE SIGNATURE OF GIORGIO AND STEFANO VAFIADIS  
by Maurizio Zacchetti

**C**hic and modern, M50 *Aria* is the project of the Italian constructor Mondomarine unveiled at the 2015 Monaco boat show: a megayacht with lightweight aluminum hull able to sail at a cruising speed of 19 knots. It will be built at the production yards of Savona, in Liguria .

The idea behind the project is to make available most of the open spaces as interiors, thanks to retractable glass windows. The result will involve an aesthetic approach and alter the functionality, revolutionising life on board.

Thanks to the opening of the transom, a huge platform can be created on the sea that transforms the area into a beach club with a minimalist and modern appeal, and one that is very convenient for those who enjoy water sports.

Thanks to this double solution, when in port, the area is transformed and usable while maintaining a

high level of privacy.

On the lower deck, there are four guest cabins, while forward on the main deck we find the owner's suite, complete with gym and a private balcony overlooking the sea.

The most amazing space is on the top deck, where there is the Vip cabin, surrounded by sliding glass doors that open fully or protect the whole area creating a spacious veranda at need. The effect when out at sea is unmatched. On the contrary, on a stifling hot day moored in port, one need just turn on the air conditioning to ensure cool comfort.

Further forward, there is another area with spa tub and a C-shaped sofa looking out to sea.

The flying bridge, dedicated to relaxation and offering a great view of the sea, is furnished with a sun deck and a spa tub, indoor lounge and piano bar further forward.

**On the facing page, bottom, the beach club gives the feeling that the aft section juts out into the sea. Above, the master stateroom with private balcony. Below, the external area of the flying bridge with relaxation area and roofed dining table.**
